Using Royalty-free Music With VN Video Editor

For iPhone:

1. Go to your Royalty-free music source (I use Bensounds.com).
2. Find a tune
3. Select DOWNLOAD
4. The music will not save to your phone. The music file will save to your iCloud Drive.
5. Go to the Music track (top line) in VN and touch the Music add icon (music note & +) on left end of music track
6. Touch MUSIC
7. Touch MORE
8. Touch IMPORT FROM FILE APP
9. This will take you to your iCloud Drive
10. Touch the music you just downloaded
11. VN will ask ADD TO and give you an option to create a NEW ALBUM or add to an existing album.
12. The music will appear in that album to add to the music track in your project.

You can then trim/split the music track to your preference, adjust volume to a suitable background level, and add fade in/out to the track.

For Android:

1. Go to your Royalty-free music source (I use Bensounds.com).
2. Find a tune
3. Select DOWNLOAD
4. The music will save to your smartphone's Download folder.
5. Go to the Music track (top line) in VN and touch the Music add icon (music note & +) on left end of music track
6. Touch MUSIC
7. Under MY MUSIC find the song that you wish to insert into your video.

You can then trim/split the music track to your preference, adjust volume to a suitable background level, and add fade in/out to the track.

If you have music stored in your computer, and
your iPhone and PC/Mac are on the same WiFi network

1. Go to the Music track (top line) in VN and touch the Music add icon (music note & +) on left end of music track
2. Touch MUSIC
3. Touch MORE
4. Touch WIFI
5. VN will generate a numeric URL to enter into your PC/MAC browser.
6. You will then be able to select music stored in your PC/MACs folders.
   It's one song at a time, no bulk transfers.
7. Your smartphone will then ask for you to create a new album or select an existing album.
